

# Tik tok Downloader

Widget documentation version 1.0

---

1. [Getting Started](#)
2. [Support Desk](#)
3. [Files & Sources](#)
4. [Version History \(Changelog\)](#)

## Introduction

---

- **Item Name :** Tik tok Downloader
  - **Item Version :** v 1.0
  - **Author :** [Hardik](#)
- 

First of all, Thank you so much for purchasing this Tik tok Downloader and for being my loyal customer. **You are awesome!**

You are entitled to get free lifetime updates to this product + exceptional support from the author directly.

This documentation is to help you regarding each step of customization. Please go through the documentation carefully to understand how this is made and how to edit this properly. Javascript, HTML, CSS and PHP knowledge is required to customize this template. You may learn basics [here](#).

## Requirements

You will need the following softwares to customize this template.

1. Code Editing Software (eg: Dreamweaver, Sublime Text or Notepad)
2. Web Browser for testing (eg: Google Chrome or Mozilla Firefox)
3. Local Server for testing (eg: Wamp Server or Xampp Server)

Be careful while editing the widget. If not edited properly, the widget layout may break completely.

No support is provided for faulty customization.

## Getting Started

---

# Just unzip all the files from your zip file(TiktokDownloader.zip) to your server's public directory. Script will start working

We are using bootstrap framework

We need jquery for Bootstrap

Bootstrap, Font-awesome, and jquery are the libraries and added in libs directory

## Support Desk

---

Please remember you have purchased a very affordable Widget and you have not paid for a full-time web Development agency. Occasionally we will help with small tweaks, but these requests will be put on a lower priority due to their nature. Support is also 100% optional and we provide it for your convenience, so please be patient, polite and respectful.

Please visit our [profile page](#) or ask question [@hardikforall](#)

### Support for my items includes:

- \* Responding to questions or problems regarding the item and its features
- \* Fixing bugs and reported issues
- \* Providing updates to ensure compatibility with new software versions

### Item support does not include:

- \* Customization and installation services
- \* Support for third party software and plug-ins

### Before seeking support, please...

- \* Make sure your question is a valid Widget Issue and not a customization request.
- \* Make sure you have read through the documentation and any related video guides before asking support on how to accomplish a task.
- \* Make sure to double check the Widget FAQs.
- \* Try disabling any active plugins to make sure there isn't a conflict with a plugin. And if there is this way you can let us know.

- \* If you have customized your Widget and now have an issue, back-track to make sure you didn't make a mistake. If you have made changes and can't find the issue, please provide us with your changelog.
- \* Almost 80% of the time we find that the solution to people's issues can be solved with a simple "Google Search". You might want to try that before seeking support. You might be able to fix the issue yourself much quicker than we can respond to your request.
- \* Make sure to state the name of the Widget you are having issues with when requesting support via codecanyon.

## Files & Sources

---

### Included Stylesheets

These are the primary CSS files used for general front-end styling. Use these to customize your theme even further. All included JavaScript codes under **TiktokDownloader/css/**

- 1. tiktok\_custom.css - custom stylesheet
- bootstrap and font awesome files are stored in libs directory

### Included JavaScript

These are the various attribution inks to the Javascript files included or modified to work with in this theme. All included JavaScript codes under **Tik tok Downloader/js/**

- 1. tiktok\_custom.js - custom javascript
- bootstrap files are stored in libs directory

# Version History (Changelog)

---

You can find the version history (changelog.txt) file on **tiktokdownloader.zip** folder or you can check changelog on widget sale page.

Once again, thank you so much for purchasing this widget. As I said at the beginning, I'd be glad to help you if you have any questions relating to this widget. No guarantees, but I'll do my best to assist. If you have a more general question relating to the widget on codecanyon, you might consider visiting the forums and asking your question in the "Item Discussion" section.

---

## Changelog

```
1-----
2-----
3Version 1.0 - April 7th, 2020
